

EXPERIENCED ENVIRONMENTAL ENGINEER/SCIENTIST

Cooperstown Environmental LLC has an opportunity for an experienced environmental professional to perform and manage projects, and assist with developing new business to drive the firm's continued growth. The position is located at our Main Street, Andover, Massachusetts office.

Job responsibilities will include the delivery of client-focused services in the private and public sector, with the current workload primarily involving hazardous waste site assessments and remediation projects. The candidate in this position will interact with clients, contractors, and internal staff; perform and manage other staff to complete data analysis, report writing, and preparation of plans and specifications; monitor project budgets and technical performance; and assist in business development as we continue to expand.

The candidate will be capable of working with a high degree of independence to perform a variety of projects possibly including environmental site assessments, site investigation/remediation projects involving sampling, compliance, SPCC Plans, construction monitoring, and treatment system O&M. Office tasks include report preparation, engineering studies and data analysis, cost estimates, preparation of plans and specifications for public bids, contractor procurement, and related tasks. Although this is not a field position, an interest in and ability to perform site work are required. The majority of our workload currently comprises Massachusetts Contingency Plan (MCP)-related projects in Massachusetts.

The ideal candidate for this position meets most or all of the following criteria:

- A B.S. in civil/environmental engineering or related discipline; Master's Degree preferred
- Minimum 5 years in environmental consulting or other directly-related experience
- PE and/or LSP certification strongly desired or potential to acquire in future
- Demonstrated writing and communications skills
- Ability to work successfully in a team environment
- Excellent computer abilities; CAD experience preferred
- Current 40-hour OSHA HAZWOPER preferred; familiarity with the MCP is a must
- A desire to contribute to our firm's success at a significant level

Cooperstown Environmental LLC was founded in 2004 and has experienced continued growth over the past eight years leading to our need for additional staff. Our stable client base includes world-class organizations in the private sector as well as local and state governments. We enjoy a fun, flexible work environment, and are dedicated to providing a challenging, rewarding growth opportunity for all employees. A certified Woman Owned Business Enterprise (WBE), we are an equal opportunity employer. See our web site www.CooperstownEnv.com.
