

Magnetic North is Moving – and So Is Cooperstown Environmental

Growth Leads to New Office in Downtown Andover

March 15, 2011

For Immediate Release

ANDOVER, MA – A few years ago scientists announced that “magnetic north” – the direction in which a compass needle points – is changing rapidly, shifting toward Russia at almost 40 miles per year. While the reasons behind this shift are complex, “core flux” has been identified as a leading cause.

The reason behind **Cooperstown Environmental LLC’s** move is very different. An environmental engineering consulting firm, it has been based in Andover, Massachusetts since it was formed in 2004. Recent growth in the firm’s business and expectations for continued strong growth has resulted in additional staff and the need for larger space.

Effective March 15, 2011, the firm is located at 23 Main Street, Andover, Massachusetts 01810. The firm’s telephone number will remain unchanged (978-470-4755). The building is known as the Bank of America building after its primary tenant and is located directly in the center of Andover’s thriving commercial district. Downtown Andover offers a myriad of amenities including food shops, banks, and easy access to public transportation that will enhance the employee experience.

James T. Curtis, Executive Vice President of **Cooperstown Environmental LLC**, commented that “Our new location reflects our growth and the success of the firm’s approach to provide quality services to address our clients’ environmental and engineering needs. This new location, with its proximity to Andover’s many businesses and amenities, is expected to be a benefit not only to our employees but our clients as well. We look forward to working with local businesses and Towns, law firms, and others as we continue our growth.”

About Cooperstown Environmental LLC

Cooperstown Environmental LLC is an environmental engineering consulting firm based in Andover, Massachusetts that provides high-quality, practical, and cost-effective engineering and environmental consulting services to businesses, property owners, institutions, government agencies, and the legal community. We also have a niche as the leading experts in the Brownfields Tax Credit program. The program began in 1998 as part of an effort to encourage and provide an incentive for the cleanup of contaminated sites, sometimes known as Brownfield sites.
