

Cooperstown Environmental LLC Announces Promotions

James T. Curtis Named President; Richard Gang Now Senior Vice President

April 5, 2011

For Immediate Release

ANDOVER, MA – Cooperstown Environmental is pleased to announce that **James T. Curtis, P.E., LSP** has been named President of the company. Mr. Curtis is a Massachusetts Registered Professional Engineer and Licensed Site Professional (LSP) with 25 years of experience in the Boston-area environmental consulting industry. He graduated from Princeton University with a Bachelor of Science in Civil Engineering and earned a Master's Degree in Environmental Engineering from Northeastern University.

As President, Mr. Curtis will lead business development efforts, oversee strategic planning and growth efforts, and continue to grow the firm's business in Brownfields Tax Credits services. He will remain active technically, and serve as LSP of Record for ongoing projects.

Richard E. Gang, Jr. has been promoted to Senior Vice President of Cooperstown Environmental LLC. Mr. Gang has more than 20 years of progressive experience in environmental consulting, risk management, and engineering. He joined the firm in 2008 as Vice President. He holds a Bachelors of Landscape Architecture from the University of Georgia and a Master of Science in Civil Engineering from Tufts University.

In his role as SVP, Mr. Gang will oversee the administrative functions for the firm, including a wide range of operational issues; manage staff development; and continue contributing to business development and technical project management.

About Cooperstown Environmental LLC

Cooperstown Environmental LLC is an environmental engineering consulting firm based in Andover, Massachusetts that provides high-quality, practical, and cost-effective engineering and environmental consulting services to businesses, property owners, institutions, government agencies, and the legal community. We also have a niche as the leading experts in the Massachusetts Brownfields Tax Credit program. The program encourages and provides an incentive for the cleanup of contaminated sites, sometimes known as Brownfield sites, by allowing recovery of up to half of qualified expenditures.
